

# PRUNUS persica 'DIXIRED'

Dixired peach, peach Dixired

Grafted peach. Pink flower end of winter, cultivar selected for size and taste of fruit.

**Maintenance advice:** After flowering, find and cut down the non flowering branches, leaving just 2-3 buds. Shorten other less flowering branches, to just above a leaf bud, to rejuvenate. Pinch the young shoots (break off between fingers while soft, or cut off, to shorten by about a half), all along the branches, to help floral buds develop the following year.

**Botanical/Horticultural origin:** Horticultural origin : bred at Beltsville Research Station (US) 1945

**Use group:** Fruit Trees

**Height at 10 years:** 4 m

**Width at 10 years:** 3 m

**Growth:** Fast

**Fragrance:** No

**Exposure:** Full sun

**Evergreen/Deciduous:**  
Deciduous

**Shape:** tree like

**Colour of leaves:** Green

**Colour of flowers:** Pink

**Soil type:** Indifferent

**Uses:** Fruit tree, Free standing specimen,
