

# PRUNUS persica 'MORTON'

peach 'Morton'

Grafted nectarine, pink flower end of winter, smooth skinned fruit.

**Maintenance advice:** After flowering, find and cut down the non flowering branches , leaving just 2-3 buds. Shorten other less flowering branches, to just above a leaf bud, to rejuvenate. Pinch the young shoots (break off between fingers while soft, or cut off, to shorten by about a half), all along the branches, to help floral buds develop the following year.

**Botanical/Horticultural origin:** Horticultural origin : breeder Cornell University, New York (US) 1965

**Use group:** Fruit Trees

**Height at 10 years:** 4 m

**Width at 10 years:** 3 m

**Growth:** Fast

**Fragrance:** No
