

PYRUS communis 'DOYENNE DU COMICE'

pear 'Doyenné du Comice', Pyrus 'Comice', Comice pear

Maintenance advice: At the end of winter, cut down any incumbent branches, to ventilate and maintain a harmonious and balanced form. Shorten any branches too long at a young age and then every 4-5 years to rejuvenate. For trellised forms, in summer, reduce spring shoots by 2/3 in length, leaving 5-6 leaves per branch, and at the end of winter cut down any twigs of more than 15cm long to just above the third bud from the base.

Botanical/Horticultural origin: Horticultural origin : bred by Hilaire Dhommé, gardener to Pierre-Aimé Millet de la Turtaudière, the director of the 'Comice Horticole' in Angers (FR) 1849

Use group: Fruit Trees

Height at 10 years: 6 m

Width at 10 years: 4 m

Growth: Medium

Fragrance: No

Exposure: Full sun

Evergreen/Deciduous: Deciduous

Shape: tree like

Colour of leaves: Green

Colour of flowers: White

Soil type: Indifferent

Uses: Fruit tree, Free standing specimen,

Calendar :
