MALUS domestica 'GRANNY SMITH'

apple Granny Smith

Maintenance advice: At the end of winter, cut off any incumbent branches, to ventilate and maintain a harmonious and balanced form. Shorten any branches too long at a young

age and then every 4-5 years to rejuvenate. For trellised forms, in summer, reduce spring shoots by 2/3 in length, leaving 5-6 leaves per branch, and at the end of winter cut down any twigs of more than 15cm long, to just above the third bud from the base

Botanical/Horticultural origin: Horticultural origin: breeder Mrs. Maria Ann Smith, New South Wales (Autralia) 1868

Use group: Fruit TreesHeight at 10 years: 4 mWidth at 10 years: 3 m

Growth: FastFragrance: No

Exposure: Full sun

Evergreen/Deciduous:

Deciduous

Shape: tree like

Colour of leaves: Green

Colour of flowers: White

Soil type: Indifferent

Uses: Fruit tree, Free standing specimen,
